CONTENTS OF VOLUME 44

Number 1/2

FIRST RADIATION PHYSICS CONFERENCE

M. A. M. Gomaa, A. Z. El-Behay, G. M. Hassib, A. M. El-Naggar and A. H. El-Kamel — VII Preface

F. H. Hammad — IX Foreword

John H. Hubbell — XI Introduction

XIII Key to Participants

I. General Section

Younis S. Selim and Mahmoud I. Abbas — 1 Source–detector geometrical efficiency

E. E. Abdel-Hady, A. M. A. El-Sayed and N. Nagy — 5 Target thickness dependence of build-up bremsstrahlung accompanying β decay of ^{99}Tc and ^{204}Tl

H. R. Saad, H. Ashry, A. El-Lawendy and S. S. Fares — 9 Decay scheme of ^{143}Ce nucleus

R. Ravishankar, Mausumi Sengupta, Tapas Bandyopadhyay, G. Muthukrishnan and A. M. Ghose — 19 Semi-empirical depth dose distribution formula for ^{60}Co γ-rays

II. Interactions of Radiation with Matter

D. B. Isabelle — 25 The PIXE analytical technique: principle and applications

A. M. A. El-Sayed, E. E. Abdel-Hady, R. A. M. Rizk and M. Mohsen — 31 Dose effect in gamma-irradiated polyethylene studied by positron annihilation lifetime technique

N. A. Eissa, N. H. Sheta, W. M. El-Meligy, S. M. El-Minyawi and H. A. Sallam — 35 Mossbauer effect study of the effect of gamma irradiation on the behaviour of iron in sodium silicate glasses

F. M. Ezz-Eldin, I. Kashif and H. A. El-Batal — 39 Some physical properties of gamma-irradiated alkali–silicate glasses

N. A. El-Alaily, F. M. Ezz-Eldin and H. A. El-Batal — 45 Durability of some gamma-irradiated alkali borate glasses

III. Radiation Detection and Dosimetry

G. M. Hassib — 53 Recent developments in radiation measurements using nuclear track detectors

Ahmad Sharief Odeh — 57 The reduction of Si diodes dark current for X-ray dosimetry

Ahmad Sharief Odeh — 61 X-ray dosimetry using a Cd sulphide photoresistor

M. S. Rasheedy, F. Nishimura and T. Ichimori — 63 Studies on the dosimetric properties of TLD-300

H. M. Eissa, S. A. El-Fiki, N. El-Enany, M. El-Bahrawy, R. I. Mohammed and H. M. El-Husseiny — 69 Effect of pre- and post-gamma-irradiation of the etching characteristics of some SSNTDs

B. A. Henaish, A. M. El-Agrami, W. I. Abdel-Fattah and W. G. Osiris — 73 Characteristic thermoluminescence of gamma-irradiated alumina ceramics doped with some alkali metals

N. K. Ahmed, M. H. Saied, A. H. El-Kamel and A. M. M. Yousef — 79 Measurements on the background atmospheric ^{222}Rn and ^{220}Rn concentrations in the Qena desert

IV. Radiation Measurements and Calibration

W. E. Y. Abdel Malik, A. S. Ibrahim, S. K. Youssef and M. A. Gomaa — 83 Estimation of unknown activities by comparative calibration method

M. S. El-Tahawy, M. A. Farouk, N. M. Ibrahiem and S. A. M. El-Mongey — 87 Natural and artificial radionuclides in the Suez Canal bottom sediments and stream water

M. S. El-Tahawy, M. A. Farouk, A. A. Hamed and N. M. Ibrahiem — 91 Analysis of the gamma-emitting impurities in ^{99m}Tc and spent ^{99}Mo generators

M. H. Saied, A. Abbady, A. H. El-Kamel and A. El-Arabi — 95 Natural radioactivity of granite rocks in Wadi Qena

A. El-Hussein and A. A. Ahmed — 99 Activity size distribution of natural radionuclides

N. K. Ahmed, M. H. Saied, A. Abbady and A. H. El-Kamel — 103 Measurements of natural radioactivity inside Dandara temple

V, VI. Radiation Shielding (A & B)

R. M. Megahid, A. M. I. Kany, A. El-Sayed Abdo and M. S. M. I. Kany — 109 Spectra and fluxes attenuation of 14 MeV neutrons in iron–graphite shields

A. M. Hathout — 115 Application of the kernel method on ET-RR-1 reactor shield

E. Amin, N. Ashoub and A. Elkady — 119 Neutron and gamma ray total dose rate determination using ANISN

Esmat Amin — 125 Review of shielding computation methodology with emphasis on the experience in the National Center of Nuclear Safety and Radiation Control

Yoshihiro Asano and Nobuo Sasamoto — 133 Development of shielding design code for synchrotron radiation beam line

Waleed H. Abulfaraj and Salah M. Kamal — 139 Evaluation of ilmenite serpentine concrete and ordinary concrete as nuclear reactor shielding

Waleed H. Abulfaraj, Tamim A. Samman and Salah El-Din M. Kamal — 149 Design of a temporary radioactive waste storage facility

A. M. I. Kany, M. I. El-Gohary and S. M. Kamal — 157 Thermal, epithermal and thermalized neutron attenuation properties of ilmenite–serpentine heat resistant concrete shield

W. A. Kansouh — 161 Studies of radiation penetration and effect of air voids in bulk concrete shield configurations

VII. Radiation Protection, Safety and Control

Mohamed I. Hussein, A. Z. Hussein, M. F. Barakat, S. Nakhla and N. Iskander — 169 Radiation levels in ancient Egyptian mummies

M. W. A. Essa, A. T. A. Abdel Fattah, R. M. K. El-Shinawy and M. A. Gomaa — 173 Radioactivity in some imported products used in certain industries in Egypt

B. A. Henaish, A. A. Tawfik, H. Abu Zaid and M. A. Gomaa — 177 Estimation of collective effective dose due to natural background radiation in Egypt

Rifaat M. K. El-Shinawy — 181 Safe transport of radioactive materials in Egypt

VIII. Medical and Biological Applications

H. A. Ashry, N. S. Selim and A. Z. El-Behay — 187 The effect of gamma-rays on the hemoglobin of whole-body irradiated mice

Soad Abd El-Salam, R. M. Yousri and T. Sallam 191 Blood lipid fractions of rats after cumulative gamma irradiation

Saad El Din, A. Aisha and A. Z. El Bahay 195 Effect of gamma irradiation on infrared spectra of rat hemoglobin

M. Ayad, Abdulrahman Melibary and Tajuddin Malabary 199 Patient exposures in Saudi diagnostic radiology

A. Mamoon, A. A. Abdul-Fattah and W. H. Abulfaraj 203 Thermoluminescence of irradiated herbs and spices

IX. Radiation Physics in Earth Sciences

Abdalla A. Abdel-Monem, H. A. Hussein, M. A. El-Taher and Saleh E. Ammar 207 Radioactivity and origin of U-mineralization at the Kab Amiri area, Central Eastern Desert, Egypt

S. O. El Khateeb and A. M. El Akraby 215 Fracture analysis and its relation to radioactivity around Gebel Um Risha, South Eastern Desert, Egypt

M. M. M. Mousa and S. O. El Khateeb 219 Rock unit mapping using statistical analysis applied to aero-radioactivity data and trend analysis for Bir Araiyida and surrounding area, North Eastern Desert, Egypt

E. E. Abdel Hady, A. M. A. El-Sayed, A. A. Ahmed and A. Z. Hussein 223 Natural radioactivity of basement younger granite rocks from the Eastern Desert

A. Abbady, M. H. Saied, A. H. El-Kamel and A. El-Arabi 225 Natural radioactivity of sand samples by low-level gamma spectrometry

X. Industrial and Other Applications

A. Mamoon, A. A. Abdul-Fattah and T. M. Qari 229 Variation of radon-222 concentration in exposure systems air under different conditions of exposure

A. S. Abdel-Haleem, E. E. M. Zohny and R. A. Zaghloul 233 The use of neutron attenuation in borated materials as an indicator of their boron content

W. M. Arafa, H. Alneimi, L. Al-Houty and H. Abou-Leila 237 Some improvements of charcoal measurement techniques used for indoor radon measurements in Qatar

XI. History and Teaching Radiation Physics in Egypt

A. M. I. Kany 241 A special concept in experimental radiation physics education

Muhammad A. Gomaa and Anas M. El-Naggar 245 Radiation protection educational programmes in Egypt

Number 3

E. G. Mavroyannakis 247 Evolution features of the *n*th order kinetic processes

E. Nedkov and S. Tsvetkova 251 *Effect of gamma irradiation on the melting characteristics of ultra* high molecular weight poly(ethylene oxide)

E. Nedkov and S. Tsvetkova 257 Structure of poly(ethylene oxide) hydrogels obtained by gamma irradiation

Zhong-Li Ding, Masaru Yoshida, Masaharu Asano, Zue-Teh Ma, Hideki Omichi and Ryoichi Katakai 263 Thermo-responsive behavior of a methacryloyl-DL-alanine methyl ester polymer gel prepared by radiation-induced polymerization

Geni R. Sunaryo, Yosuke Katsumura, Izuru Shirai, Daisuke Hiroishi and Kenkichi Ishigure 273 Radiolysis of water at elevated temperatures—I. Irradiation with gamma-rays and fast neutrons at room temperature

Myran C. Sauer Jr and **Charles D. Jonah**	281	The ratio of triplet to singlet excited state formation from ion recombination in the radiolysis of aromatic solutes in alkane liquids
Mohamad Al-Sheikhly	297	The reactivity of adenyl and guanyl radicals towards oxygen
Zhang Lihua, Zhou Maotang and **Chen Donglin**	303	Effects of structure multiplicity on mechanism of radiation crosslinking of polymers
Charles L. Crawford, Mohammad R. Gholami, Ravindra N. Bhave and **Robert J. Hanrahan**	309	Pulse radiolysis of aqueous solutions of sodium tetraphenylborate
N. G. Joshi, S. J. Dhoble, S. V. Moharil and **A. N. Garg**	317	Effect of particle size on gamma ray induced decomposition in KI and KI · KNO_3 crystals
Young Soo Kang, Hugh J. D. McManus and **Larry Kevan**	323	An electron spin resonance study on the gamma-irradiation of urea, urea-d_4, 1,3-dimethylurea, 1,3-diethylurea and 1,1′,3,3′-tetramethylurea
M. Mateev	329	A radiation method for variation of the insulator–conductor transition of polyethylene compositions
W. M. Bartczak and **A. Hummel**	335	Kinetics of charge recombination in high-energy electron tracks in nonpolar liquids, calculated by computer simulation. The survival of the charged species at long times
Technical Note **D. M. Timus**	341	Further study of the flux density distribution of a disk-shaped, isotropically emitting source in nondispersive media
	347	*Erratum*
	I	*Announcements*

Number 4

Norihiko Fujita, Harutsugu Morita, Chihiro Matsuura and **Daisuke Hiroishi**	349	Radiation induced CO_2 reduction in an aqueous medium suspended with iron powder
S. Araikum, T. L. Nam and **R. J. Keddy**	359	Radiation dosimetry based on the radiophotoluminescence of synthetic diamond
Donald B. O'Connor	371	Pulse radiolysis with circular dichroism detection
V. Badescu	377	Flux geometric factors of a spherical source of non-isotropic radiation
Qi Yao, Limin Liu and **Changjiang Li**	381	Low energy proton implanted polyaniline
V. Haddadi-asl, R. P. Burford and **J. L. Garnett**	385	Radiation graft modification of ethylene–propylene rubber—I. Effect of monomer and substrate structure
M. A. Sharaf	395	Depth–dose in an anthropomorphic head phantom for mono-energetic photons
B. D. Symeopoulos, H. Papaefthymiou and **M. Soupioni**	399	Oscillatory annealing behaviour of three neutron irradiated inorganic crystalline compounds
T. K. Saha, Mubarak A. Khan and **K. M. Idriss Ali**	409	Physical and mechanical properties of ultraviolet (UV) cured films
Mubarak A. Khan and **K. M. Idriss Ali**	415	Dose effect in the wood plastic composite formation in the presence of additives and co-additives
K. M. Idriss Ali, Mubarak A. Khan and **M. M. Husain**	421	Role of additives in wood plastic composite of water soluble monomer

K. M. Idriss Ali, Mubarak A. Khan and M. M. Husain 427 Study of wood plastic composite in the presence of nitrogen containing additives

P. G. Fuochi 431 Irradiation of power semiconductor devices by high energy electrons: the Italian experience

M. A. El-Kolaly, M. E. Kassem, A. A. Higazy, L. Z. Ismail and L. I. Al-Houty 441 Thermoluminescence and dielectric response of $LiKSO_4$:Gd to γ-radiation

447 *Corrigendum*
